Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3-5, 7-10, 12-16, 33, and 35-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Jakob et al (US. Pat. No. 5,129,408).

Jakob et al discloses all that is recited in the claims since it teaches a cigarette and smokable material therefor which comprises, as seen in the Figures, a lighting end and a mouth end. An outer paper wrapping material 25 circumscribes a rod (corresponding to the claimed "inner portion") which includes a smokable material 25 which is comprised of some form of tobacco (i.e. expanded, reconstituted, laminae, stems, etc) in intimate contact with aerosol forming/casing materials, such as glycerin. As clearly evident from the drawings, the rod has a cylindrical shape and the lighting end is open to expose the rod such that the smokable material of the rod is positioned for lighting at the lighting end (See entire document and figs.)

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6, 17, 19-26, 28-32 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jakob et al (US. Pat. No. 5,129,408).

While Jakob et al may state that a low porosity wrapper, having CORESTA of less than 5, is preferred such is not required. Therefore, it would have been obvious to one having ordinary skill in the art at the time of the invention to have provided an outer wrapping material having the claimed CORESTA values, since such values are well-known and readily available on the market.

Response to Arguments

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
